

Nare Kosbekian

Product Designer | Vancouver, BC

nare.kosbekian@gmail.com | narekosbekian.com | linkedin.com/in/nare-kosbekian |

Summary

Product and UX/UI Designer with 8 years of experience owning design work end to end, from research through shipped interface. Led design for AlKhataba, a matrimonial matching app serving 8M+ users across the GCC, North Africa, Southeast Asia and Turkey in both Arabic (RTL) and English (LTR).

Experience

Lead Designer

June 2024 – June 2026

ET3Labs · Beirut, Lebanon

- Grew paid conversion 14.3% by rebuilding how plans were presented, surfacing pricing at the moments users were already deciding, and replacing a hidden comparison with a visible one.
- Got 9 research-driven changes adopted across 6 release cycles by defining the platform's event and data model with the CTO, then converting each release's behavioural data into a Power BI review that paired every finding with a specific proposed change.
- Replaced assumption with moderated evidence in three markets, Indonesia, Malaysia and Turkey, by recruiting and training local moderators to NN/g protocol to run research in languages I don't speak.
- Convinced the board and CEO to fund a full rebranding of the product after A/B testing and surveys across 6 persona segments showed the existing style was alienating the core audience.
- Directed a four-person design team with UX/UI designer, UX copywriter, social media and marketing designers.
- Cut post-handoff UI rework 58% by pulling engineering and QA into design review before build sign-off instead of after it.
- Raised selfie-verification completion among female GCC users from 1.2% to 4.3% by diagnosing the drop-off as a trust barrier rather than a usability one and reframing verification as a safety benefit users received rather than a demand made of them.

Senior Designer

January 2022 – May 2024

ET3Labs · Beirut, Lebanon

- Shipped subscription billing across three surfaces, iOS, Android and web via Stripe and HyperPay, designing one payment experience that satisfied each platform's compliance requirements without fragmenting into three.
- Cut onboarding from over seven minutes to three by stripping the intake quiz to essentials and deferring full profile completion until after users had seen the product, reducing onboarding churn by 23%.
- Increased discovery of the product's key features by 30% by restructuring the navigation and page hierarchy based on A/B test results.

Junior Designer

June 2021 – December 2021

ET3Labs · Beirut, Lebanon

- Shipped UI across the full AlKhataba feature set in both Arabic (RTL) and English (LTR).
- Rebuilt the internal admin dashboard used by operations and support staff, cutting it down to the tasks the team performed daily.
- Mapped the competitive landscape in the GCC matchmaking category, identifying the feature gaps.

Freelance Product & UX Designer

June 2018 – February 2026

Nare Design · Remote

- Shipped B2C and SaaS websites and brand identities for 25+ startups and organisations worldwide, with clients in the USA, UAE, France, Lebanon and Armenia.

Education & Certification

Graduate Professional Diploma, UX/UI Design

American University of Beirut

Five-term graduate diploma in design research, interaction design for web and mobile, and UX management strategy. Coursework covered human-centred research, usability testing and optimization, wireframing and prototyping, and Arabic RTL alongside LTR interface design.

Bachelor of Arts, Graphic Design

Lebanese International University

Graduated with Honours.

AI Starter Kit, Professional Certificate

American University of Beirut

8-week program on applied AI: prompting, AI-assisted data analysis and reporting, no-code workflow automation, and responsible AI practice around bias and privacy.

Skills

Research & Methods: Usability testing (NN/g methodology) and moderator training, A/B testing, surveys, research operations, KPI and event instrumentation, funnel and drop-off analysis, journey mapping, competitive analysis.

Product Design: End-to-end product design, information architecture, interaction design, wireframing, prototyping, design systems, bilingual RTL/LTR systems, localisation and cross-cultural design.

Leadership & Process: Design team leadership, mentorship, design critique, cross-functional collaboration with engineering, product and data analytics, roadmap input, release planning, stakeholder presentations.

Tools & AI: Figma, Power BI, Jira, Slack, Claude Code, Claude Design, Figma Make, Adobe Creative Suite.

Languages: English (fluent), Arabic (fluent), Armenian (fluent).
